Control arm - adjust. toe/camber **KTA109**

2x front arms and 4x rear bushes
4x complete arms - wagon
4x complete arms - sedan

Introducing a new range of adjustable rear control arms for Subaru Impreza, WRX and Sti. The broadest range on the market with models to suit sedan and wagon reflecting the different rear tracks. Avoids excessive rear swaybar link pre-load and failure found with other brands while using stronger than OE link mounts. This is another cause of excessive flex and premature failure with some other brands. Whiteline kits are specifically engineered for serious use and larger swaybars

Use KTA107 as an economical solution to lack of rear toe adjustment particularly on GD-GH (MY01 on) series. This kit is supplied as 2x adjustable front arms and matching rear arm poly bushes. KTA108 and KTA109 feature 4 complete adjustable arms with performance low compliance bushes.
