370Z

Adjustable stabilizer bars

NOW AVAILABLE

Adjustable sway bars for the NISSAN 370Z

The front sway bar (BNF41Z) features a solid 33mm adjustable set up, whilst the rear sway bar boasts 24mm (BNR37Z) in diameter. Both offer 2 points of adjustment allowing their stiffness to be altered by increasing or reducing the length of the lever arms.

A sway bars objective is to reduce sway, or body roll, and stabilise a vehicle under lateral (cornering) forces. Having adjustability permits the roll stiffness to be tuned for different situations without replacing the entire bar. The stiffer the bar, the more force required to move the left and right wheels relative to each other. This increases the amount of force required to make the body roll.

Cornering loads are spread more evenly across the tyres delivering more grip and frankly, that's what it's all about. You also get improved tyre wear as your tyres stay flatter and more upright. Comfort improves because your car sits flatter through bends meaning less movement inside the vehicle.

Whiteline Swaybars are part of the Whiteline handling system. Designed to match and integrate with Chassis Bracing and key alignment products to deliver a fully balanced handling solution.

Polyurethane bushings are also included with lateral locks finishing off the kit to prevent walking of the sway bar.

So without reducing comfort, a Whiteline Swaybar will make your suspension system and tyres perform better, making the car more responsive while delivering more grip.

NISSAN 370Z

- BNF41Z** Front 27mm 2 point adjustable sway bar
- BNR37Z** Rear 24mm 2 point adjustable sway bar
